**Subject:** Soitec water question

Hi Jim,

The 2 one-age AECOM construction water demand estimation sheets for Rugged Solar and Tierra Del Sol Solar say they are based on a 42.1 acre site located near Boulevard, CA.

Please ask AECOM to identify and provide the following:

1. the actual location of the 42.1 acre site
2. what the site was/is used for
3. when the referenced work was conducted
4. the construction water consumption report or other document(s) that AECOM's 24,204 GAL/ACRE figure is based on

Thanks!

Donna
